Shade Styles

1] Standard Roman Shade

Shade is raised by means of cords, which hang in front of the shade. Includes a 6-inch valance to conceal the components. When raised, the material rises from the bottom in flat folds.

21 Waterfall Shade

Shade is raised by means of cords, which hang behind the shade. Material is attached to the front of the head rail, without a valance. When raised, the material rises from the bottom in flat folds.

Optional back valance is available on request.

Features two separate, independently operated shades on one head rail. The front shade can be either a standard or waterfall natural woven shade.

A separate liner shade is attached to the back of the head rail and both shades operate independently. Lift cords can be on the same side or opposite sides of the shade.

Available with Roll Ease® clutch control for the front, natural woven shade or for both shades. See specifications for headrail sizes.

No Charge Options

Valance returns supplied with all outside mount shades. They also are available on request with inside mount shades.

Standard valance returns are 6" long and are made of the bamboo pattern chosen.

Short returns (2" long) are available on request. Short returns conceal the end of the headrail and components and remain clear of the shade when it is fully raised.

Hold down brackets supplied upon request (not available with wide edge binding).

Spacer blocks are available upon request.

1] Standard

2] Waterfall

Shown with cords on same side.

Shown with cords on opposite sides.

3] Twin Shade (in Standard Style)

Extra Charge Options for Shades

Pricing for all Extra Charge Options can be obtained by pricing the shade and then adding the appropriate price from the Surcharge Charts for the chosen options. All prices in the Surcharge Charts are retail surcharges.

Cut Outs

Cut Outs can be taken from either side of the shade. Please provide exact dimensions and the locations of cut outs required.

There may be limitations to what can be cut out, based upon the size and specifications of the shade. The factory will review all orders for cut outs and provide confirmation of each order within 24 hours.

Cut Outs are not available with edge binding.

Clutch Control and Continuous Cord Loop

Clutch controls are available with all shade styles. Clutch controls are not available with Top Down Bottom Up.

Shades with clutch controls will be shipped without cord cleats, but with a RollEase® cord safety clip.

Shades with clutch controls will be mounted on a wider head rail (see Specifications for details).

Cord loops will be either Natural or Cocoa color, based on the color of the pattern chosen.

Standard cord loop length is half the height of the shade. Other sizes are available (in increments of one foot) upon request. A surcharge will be applied for lengths over 5 feet.

Metal bead chain is also available as a surcharge option.

Metal bead chain and special cord lengths may be shipped separately.

Edge Binding

Edge bindings are available in two widths: 1 ½" total (¾" on the face of the shade) and a 3" total (1 ½" on the face of the shade). Wide edge binding is applied to the sides of the shade and the valance and to the bottom of the shade. Narrow edge binding is applied to the sides of the shade and valance only and not across the bottom of the shade.

Fabric Valance Returns

For shades with edge binding, returns made from the edge binding fabric are available as a surcharge option.

Liners

Available in Privacy or Black-Out liner. Available with Edge Binding. Liners are secured to the back of the shade by stitches at each side of the liner.

Privacy liners feature sewn-in ribs to give the liner the appearance of a finished roman shade. There are no ribs sewn into liners for shades with edge binding.

Standard Shade with Continuous Cord Loop

Standard Shade with Wide Edge Binding

Extra Charge Options for Shades

Lined Valance

Lined valances are recommended to conceal the head rail components, where an open-weave pattern is selected. This is particularly recommended if clutch controls are chosen as these components are more visible through the valance. We recommend lined valances for the following patterns:

Bamboo Reeds	Bora Bora	Caribe	Laguna	Monterey	Nocturne	Rustic
Bamboo Weave	Cabana	Hana	Lattice	Moorea	Parchment	Westport

We recommend that Waterfall Shades made with clutch controls in these patterns should be ordered fully lined.

All Top Down Bottom Up Shades will be shipped with lined valances as standard.

Multiple Shades on One Head Rail

Shades can be ordered two-on-one head rail, or three-on-one head rail, up to a maximum width of 120 inches. The width limit for a common valance is 96 inches.

Normal inside mount deductions will be made and there will be a maximum ½ inch gap between shades.

Top Down Bottom Up Shades

Shade can be raised from the bottom or lowered from the top, by two sets of cords on opposite sides of the shade. Includes a 6-inch valance to conceal the components. When raised, the material rises from the bottom in flat folds. Available with Liners and Edge Bindings.

All Top Down Bottom Up Shades will be supplied with lined valances to conceal the components and any light gap which may be visible at the top of the shade. This is included in the Top Down Bottom Up surcharge.

Top Down Bottom Up shades are only available to 84" wide.

Valances

Shades can be ordered with custom length valances. Double and Triple hobbled valances are also available.

Valances are also available without shades, as a decorative feature. These can be standard valances in any length, or double or triple-hobbled valances and will come mounted on a headboard with installation hardware and returns if requested.

Size Limitations

Minimum Width: 12 inches

Maximum Width: 96 inches

Maximum Height: 18 inches

Maximum Height: 108 inches

Minimum Width Roll Ease Clutch: 18 inches

Maximum Width Top Down Bottom Up: 84 inches

Multiple shades on one head rail can be ordered to 120 inches wide. Maximum width for common valance is 96 inches.

Bracket Dimensions

Height: 1½ inches Depth: 1¾ inches

Inside Mount Depths

Minimum Required Depth:

34 inch with standard bracket

Flush Mount Depth:

Headrail width plus 1 inch if using standard bracket.

Exact flush inside mount depths will vary slightly based upon the thickness of the fabric.

Inside Mount Deductions

The factory will make a deduction of ³/₈ inch for all Inside Mount shades, unless otherwise requested.

Folding Doors

Folding doors are ideal for large windows or doors and hang vertically from hangers, which slide smoothly inside an aluminum track. The hangers are spaced approximately every four inches to create evenly spaced folds in the material.

Not all patterns can be used for the folding door, because the material has to hang straight and be able to stack back in folds when open. Refer to the Material Reference Chart for available patterns.

On each side of the folding door material are bamboo wood bars, with handles, if desired. The bamboo wood bars are a natural "carbon" color, which is a light wood tone that coordinates well with all patterns. The bars are strong, light weight and add a beautiful finishing touch to your shade.

Folding doors come in one of two configurations: One Way Opening or Center Opening.

No Charge Options

One Way Opening

When open, the material stacks back either to the right or the left. Specify on the **Order Form** which side of the door the drapery will stack to.

NOTE: If you want the material to stack back completely clear of the window, for an unobstructed view when the door is open, allow for the width of the stack in the overall width of the door.

Track Color

All folding doors are available with brown or white track. Brown will be supplied, unless white is requested on the **Order Form**.

Handles

Handles and screws are provided with each door.

Drapery Style

Folding Doors can be ordered "Drapery Style", with no edge bars and with edge binding on four sides of the panel. This gives a softer look to the shade.

One-Way Left Stack

Drapery shown with edge binding

Folding Door Surcharge Options

Center Opening (Split Draw)

The door is made from two panels, which are equal width and meet in the middle. They open to opposite sides of the window.

Each panel has a bamboo wood bar on each side and the two middle bars have small, countersunk magnets which hold the two bars together tightly, when the panels are in the closed position.

Fullness

The standard folding door comes with 5% fullness, which means that it lies nearly flat when fully extended.

Folding doors can be ordered with 20% fullness, which gives fuller folds.

Liners

Available in Privacy or Black-Out Liner. Liners are attached to the top of the folding door and are secured down both sides beneath the bamboo wood bars.

Valance

Standard folding doors come with track and panels. Adding a valance provides a decorative touch, which conceals the track and hangers and blocks any light gap between the track and the top of the door.

The valance is 8 inches long and is mounted to a wood board, 5 ½" deep and ¾" thick. The valance is attached to the front edge of the board by velcro.

The valance is oriented in the same direction as the door (vertically) and is edge-bound on the top and the bottom.

For Inside Mount shades, the valance will cover the front of the valance board only. For Outside Mount shades, the valance will be made to wrap around both ends of the valance board.

Size Limitations

Minimum Width: 24 inches Maximum Width: 192 inches Minimum Height: 24 inches Maximum Height: 96 inches

Important Information for Ordering and Installing Folding Doors

Doors without a Valance

For shades without a valance, the height of the folding door is measured from the top of the track to the bottom of the fabric.

There is a gap of approximately ¾" between the top of the track and the material. The factory will deduct this amount from the ordered length when they make fabric panel.

Doors with a Valance

For shades with a valance, the height of the folding door is measured from the top of the valance board to the bottom of the fabric.

The valance board is ¾" thick and there is ¾" between the top of the track and the top of the material. The factory will deduct 1 ½" from the ordered length when they make the fabric panel.

Inside Mount Measurements

Minimum Inside Mount Depth: 2 inches

Check for any obstructions, such as trim or handles that may interfere with the opening and closing of the door.

Inside Mount Deductions:

Width: ¼" Height: ¾"

No deductions are made to the width or height of Outside Mount shades.

3/4"

Track Dimensions

Stacking Chart

WIDTH	STACK
36"	8 ½"
42"	9"
48"	9 ½"
60"	11"
72"	12"
84"	13"
96"	14"

Center Opening shades will open into two equal stacks on each side of the shade. For example a 96" Center Opening will have two stacks each the size of a 48" One Way.

20% Fullness shades will stack approximately 1 inch wider for small shades and 1 ½ inches wider for larger shades, than a 5% Fullness shade of the same size.

All stacking dimensions are approximate and will vary by pattern.

Ring Drapery

Ring draperies are suitable for large windows or doors and hang from a drapery rod. Drapery rods are not supplied with the shade, so you may select your own to match your décor. The drapery rod passes through grommet rings in the edge binding fabric at the top of the drapery.

Ring draperies have between 50% and 80% fullness, depending on the width. This extra fullness gives them a more luxurious, drapery type look than a folding door.

Not all patterns can be used for the ring drapery, because the material has to hang straight and be able to stack in folds when open. Refer to the **Materials Reference Chart** for available patterns.

The ring drapery is bound on all four sides with edge binding fabric, which provides a soft, drapery look, protects the edges from damage and adds a touch of color. Select your Edge Binding fabric to suit your décor and your choice of pattern.

Because large draperies can be heavy, it is expected that the drapery rod will need a center support bracket, so unless otherwise specified, all draperies are supplied as two panels (center opening).

Shown with bamboo rod

Shown with metal rod

No Charge Options

One Way Opening

Only available up to 48", unless specially requested. Otherwise all draperies are made as two panels (center opening).

Edge Binding Color

Select your color from the 10 Edge Binding fabrics.

Grommet Color

Grommets are available in Antique Brass, Brushed Silver or Black. Antique Brass will be supplied as standard unless Brushed Silver or Black is requested.

Surcharge Options

Liners

Available in Privacy or Black-Out Liner. Liners are sewn under the edge binding on all four sides of the panel. Liners are particularly recommended where privacy and/or insulation are important.

Ring Drapery Specifications

Size Limitations

Minimum Width: 42 inches Minimum Height: 36 inches Maximum Width: 120 inches Maximum Height: 96 inches

When measuring and installing we recommend a ¾ inch gap between the bottom of the drapery and the floor.

Fullness

Fullness is calculated based on the number of rings of each width. Each ring requires 5 ½ inches of fabric width. All draperies are made with an even number of rings. For example, an 84" wide, center opening drapery has 12 rings per panel or 24 rings total. This equals 132 inches of fabric or 57% fullness.

Your ring drapery will be made to your custom width. The factory takes your width and determines how many rings are required for that width.

Stacking Chart

The chart shows how many rings will be used at each width and the stack dimensions, based on a center opening drapery (2 panels).

All stacking dimensions are approximate and will vary by pattern.

Deductions

No deductions will be made by the factory for ring draperies.

Ring Size

The diameter of the inside of the rings is 1 $\frac{1}{2}$ inches. There is $\frac{1}{2}$ fabric above the ring.

WIDTH	NUMBER OF RINGS EACH PANEL	STACK EACH PANEL	TOTAL STACK
42″	6	3.5~	7″
48″	8	4-	8-
60″	8	4-	8-
72″	10	4.5~	9~
84″	12	5.5*	11"
96″	14	6-	12"
102″	14	6~	12"
120″	16	7″	14*

Sliding Panels

Sliding panels provide a clean, contemporary look for large windows and doors. Overlapping panels are suspended from hangers, which glide smoothly in an aluminum track and pass in front of each other, to allow the panels to stack back away from the window.

The panels are supplied with edge binding to protect them from wear and tear and the panels are customed-sized, based on the width of the shade and the number of panels. Panels can be made with privacy or black-out liners.

Sliding panels can be one way draw or center opening. They are also available with wand or cord operation.

Note: Bamboo and natural materials can stretch or shrink, so we recommend that panels are ordered with at least %" clearance from the ground. Also, when shipped from the factory, panels may be slightly different lengths (up to ½" from the ordered length). Shorter panels can be made longer by gently pulling on the bottom of the panel until they are the same length as longer panels.

One-Way Right Stacked

No Charge Options

One Way Opening

When open the panels stack back to either the right or the left. Specify on the order form which side of the window the panels will stack to.

NOTE: If you want the material to stack completely away from the window, for an unobstructed view, allow for the width of the panels in the overall width of the shade. See **"Specifications"** for more details.

Center Opening

Must be made with an even number of panels and the panels will stack back to both sides.

Wand Draw

Shade is operated by means of a white aluminum wand which clips into the front edge of the lead panel. Wood wands are available (see **Surcharge Options**).

Center Opening

Sliding Panel Surcharge Options

Liners

Available in Privacy or Black Out. Liners are sewn under the edge bindings on all four sides of the panels.

Valance

Valances are 8" long and are attached to the front and sides of the track by velcro. If ordered with the original shade, the velcro for the valance will be riveted to the front of the track, to ensure a lasting bond.

Valances are cut up the roll, so they wrap around the ends of the track. Valance returns are not required. For Inside Mount shades the valance will cover the front of the track only. For Outside Mount shades the valance will be made to wrap around both ends of the track.

If valances are ordered separately, both halves of the velcro will be provided, but the bond between the velcro and the track will not be as durable.

Wide Edge Binding

Panels will come with narrow (1 %") edge binding as standard, which means that %" is visible on the face of the panels. Wide (3") edge binding is also available in the same colors.

Wood Wands

Wood wands are available 38" long and in a natural wood color or brown walnut color (with a clear coat). Wood wands attach by means of a hook to the front edge of the lead hanger.

Liner

Valance shown with narrow edge binding

Valance shown with wide edge binding

Sliding Panel Specifications

Minimum Width: 48" Minimum Height: 24" Maximum Width: 144" Maximum Height: 108"

One Year Limited Warranty

What is covered by this warranty and for how long:

For a period of one (1) year from the date of purchase, all products are warranted against defects in materials and workmanship provided that the product is installed according to the product instructions. We reserve the right to determine if your piece warrants a repair or partial replacement of any parts or in the unlikely event the entire piece is defective, we will replace this window covering with a new window covering of equal or superior value. This shall be your sole remedy under this warranty.

Who is covered by this warranty:

This warranty applies to the original customer with proof of purchase in a residential application within the United States.

What is not covered in this warranty:

This warranty does not cover removal or installation or reinstallation of any window covering. This warranty does not cover damage or defects caused by or resulting from improper maintenance, neglect or improper use, abuse, misuse, neglect, accidents, Acts of God, alteration, commercial use, installation, removal or reinstallation or exposure to excessive moisture.

Your rights under State Law:

This warranty gives you the specific legal rights. You may also have other rights which may vary from state to state. We will not be liable for **INCIDENTAL OR CONSEQUENTIAL DAMAGES** or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER OBLIGATIONS, LIABILITIES, OR WARRANTIES.
