Standard Shade Styles

All standard shade styles operate with a **cord lock** and are supplied with **cord cleats** to keep the cords tidy and away from children or pets.

Cord Lock

Cord Cleat

Standard Roman Shade

Shade is raised by means of cords, which hang in front of the shade. Includes a 6-inch valance to conceal the components. When raised, the material rises from the bottom in flat folds.

Waterfall Shade

Shade is raised by means of cords, which hang behind the shade. Material is attached to the front of the head rail, without a valance. When raised, the material rises from the bottom in flat folds.

Optional back valance is available on request.

Hobbled Shade

Shade is constructed the same way as a Standard Shade, with a 6" valance and cords in front of the shade. When lowered, the shade maintains its folds, giving it a soft fabric look.

NOTE that Hobbled shades contain more material and are heavier than the Standard Roman and Waterfall shades.

Valances and Valance Returns

Valance returns supplied with all outside mount shades. They also are available on request with inside mount shades.

Standard valance returns are 6" long and are made of the bamboo pattern chosen.

Short valance returns (2" long) are available on request. Short returns conceal the end of the headrail and components and remain clear of the shade when it is fully raised.

Fabric Valance Returns

For shades with edge binding, returns made from the edge binding fabric are available as a surcharge option.

6" standard valance return

2" short valance return

Control Options

Clutch Control and Continuous Cord Loop

Clutch controls are available with all shade styles. **Clutch controls are not available with Top Down Bottom Up.**

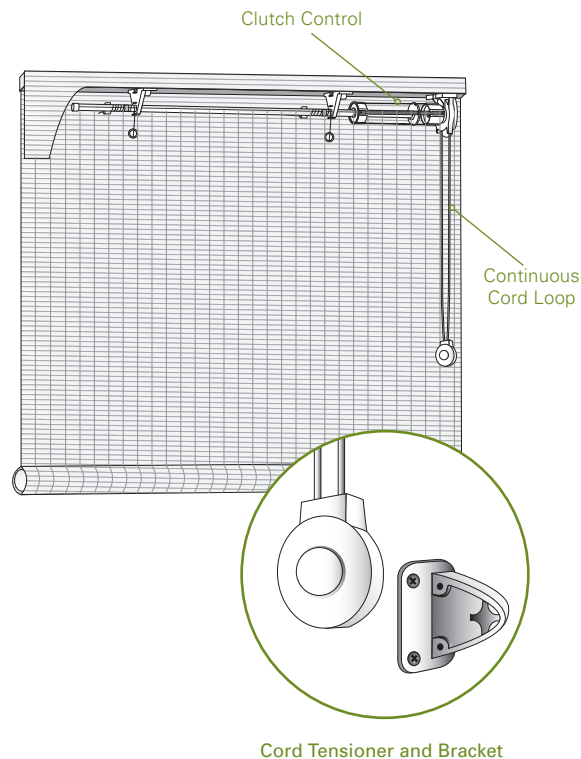

Shades with clutch controls will be shipped without cord cleats, but with a RollEase® cord safety clip.

Shades with clutch controls will be mounted on a wider head rail (see **Specifications** for details).

Cord loops will be either Natural or Cocoa color, based on the color of the pattern chosen.

Standard cord loop length is half the height of the shade. Other sizes are available (in increments of one foot) upon request. A surcharge will be applied for lengths over 5 feet. Longer cord loops may be shipped separately.

Metal bead chain is also available as a surcharge option. Metal bead chain may be shipped separately.

Cord Tensioner and Bracket

Top Down Bottom Up Shades

Shades can be raised from the bottom or lowered from the top by two sets of cords on opposite sides of the shade. Includes a 6" valance to conceal the components. Available with liners and edge binding.

All Top Down Bottom Up shades will be supplied with lined valances to conceal the components and any light gap that may be visible at the top of the shade. This is included in the Top Down Bottom Up surcharge.

Top Down Bottom Up shades are only available to 84" wide.

Motorized Shades

Most sizes and styles of shades can be motorized. Please call us to discuss motor specifications and prices based on the size and weight of the shades.

Liners

Liners can be ordered attached to the back of the shade or as a separately operable, movable liner (Twin Shade below).

Attached Liners

Available in Privacy or Black-Out liner. Liners are secured to the back of the shade by stitches at each side of the liner.

Liners have sewn in ribs to give the appearance of a finished roman shade. There are no ribs sewn into liners for shades with edge binding.

Top Down Bottom Up shades are only available to 84" wide.

Twin Shade

Features two separate, independently operated shades on one head rail. The front shade can be either a standard or waterfall natural woven shade.

A separate liner shade is attached to the back of the head rail and both shades operate independently. Lift cords can be on the same side or opposite sides of the shade.

Available with Roll Ease® clutch control for the front, natural woven shade or for both shades.

See Specifications for headrail sizes.

Lined Valance

Lined Valance are recommended to conceal the head rail components where an open-weave pattern is selected.

All Top Down Bottom Up Shades are made with lined valances as standard.

Edge Binding

Available in 2 widths: 1" (½" on the face of the shade) and 3" (1 ½" on the face of the shade).

Narrow edge binding is applied to the sides of the shade and the valance.

Wide edge binding is applied to the sides of the shade and the valance and also to the bottom of the shade.

Wide edge binding not available with hold down brackets.

Standard Shade
shown with narrow edge binding

Standard Shade
shown with wide edge binding

Multiple Shades on One Head Rail

shown with two shades

Shades can be ordered two-on-one head rail, or three-on-one head rail, up to a maximum width of 120 inches. The width limit for a common valance is 120 inches.

Normal inside mount deductions will be made and there will be a maximum ½ inch gap between shades.

Other Options

Cut Outs

Cut Outs can be taken from either side of the shade. Please provide exact dimensions and the locations of cut outs required.

There may be limitations to what can be cut out, based upon the size and specifications of the shade. The factory will review all orders for cut outs and provide confirmation of each order within 24 hours.

Cut Outs are not available with edge binding.

Fabric Wrapped Headrail

Standard shades come with a stained wood headrail. Fabric wrapped headrails are a decorative option, where the headrail is covered with the same woven wood material as the shade.

Brackets and Spacer Blocks

Hold down brackets supplied upon request (not available with wide edge binding).

Spacer blocks are available upon request.

Size Limitations

Minimum Width: 12 inches Minimum Height: 18 inches
Maximum Width: 96 inches Maximum Height: 108 inches

Minimum Width Roll Ease Clutch: 18 inches

Maximum Width Top Down Bottom Up: 84 inches

Multiple shades on one head rail can be ordered to 120 inches wide. Maximum width for common valance is 96 inches.

Bracket Dimensions

Height: 1 1/2 inches

Depth: 1 3/4 inches

Inside Mount Depths

Minimum Required Depth:

3/4 inch with standard bracket

Flush Mount Depth:

Headrail width plus 1 inch if using standard bracket.

Exact flush inside mount depths will vary slightly based upon the thickness of the fabric.

Inside Mount Deductions

The factory will make a deduction of 3/8 inch for all Inside Mount shades, unless otherwise requested.

Ring Spacing and Stack Height

Rings are spaced 7" apart on the back of the shade. The stacking height will be approximately 8" - 10" for all heights of shades.

Folding Doors

Folding doors are ideal for large windows or doors and hang vertically from hangers, which slide smoothly inside an aluminum track. On each side of the door are bamboo bars with handles, if desired. The bamboo wood bars are a natural "carbon" color, which is a natural, light wood tone that coordinates well with all patterns. All folding doors are provided with brown track. White track can be supplied on request.

Check the Material Reference Chart for which patterns are available to be made as Folding Doors.

Folding doors come in one of two configurations: **One Way Opening** or **Center Opening**.

One Way Opening

When open, the material stacks back either to the right or the left. Specify on the **Order Form** which side of the door the drapery will stack to.

NOTE: If you want the material to stack back completely clear of the window, for an unobstructed view when the door is open, allow for the width of the stack in the overall width of the door.

One-Way Left Stack
shown with valance

Center Opening (Split Draw)

The door is made from two panels, which are equal width and meet in the middle. They open to opposite sides of the window.

Each panel has a bamboo wood bar on each side and the two middle bars have small, countersunk magnets which hold the two bars together tightly, when the panels are in the closed position.

Center Opening - Split Draw
shown with valance

Options

Fullness

The standard folding door comes with 5% fullness, which means that it lies nearly flat when fully extended.

Folding doors can be ordered with 20% fullness, which gives fuller folds.

5% fullness
shown with valance

20% fullness
shown with valance

Liners

Available in Privacy or Black-Out Liner. Liners are attached to the top of the folding door and are secured down both sides beneath the bamboo wood bars.

Valance

Standard folding doors come with track and panels. Adding a valance provides a decorative touch, which conceals the track and hangers and blocks any light gap between the track and the top of the door.

The valance is 8 inches long and is mounted to a wood board, 5 1/2" deep and 3/4" thick. The valance is attached to the front edge of the board by velcro.

The valance is oriented in the same direction as the door (vertically) and is edge-bound on the top and the bottom.

For Inside Mount shades, the valance will cover the front of the valance board only. For Outside Mount shades, the valance will be made to wrap around both ends of the valance board.

Center Opening – Split Draw
shown without valance

Valance

Folding Door Specifications

Size Limitations

Minimum Width: 24 inches

Minimum Height: 24 inches

Maximum Width: 192 inches

Maximum Height: 96 inches

Important Information for Ordering and Installing Folding Doors

Doors without a Valance

For doors without a valance, the height of the folding door is measured from the top of the track to the bottom of the fabric.

There is a gap of approximately $\frac{3}{4}$ " between the top of the track and the material. The factory will deduct this amount from the ordered length when they make the fabric panel.

Allow 2" clearance from wall or any obstructions.

Doors with a Valance

For doors with a valance, the height of the folding door is measured from the top of the valance board to the bottom of the fabric.

The valance board is $\frac{3}{4}$ " thick and there is $\frac{3}{4}$ " between the top of the track and the top of the material. The factory will deduct 1 $\frac{1}{2}$ " from the ordered length when they make the fabric panel.

Inside Mount Measurements

Minimum Inside Mount Depth: 2 inches

Check for any obstructions, such as trim or handles that may interfere with the opening and closing of the door.

Inside Mount Deductions:

Width: $\frac{1}{4}$ "

Height: $\frac{3}{4}$ "

No deductions are made to the width or height of Outside Mount doors.

Stacking Chart

WIDTH	STACK
36"	8 $\frac{1}{2}$ "
42"	9"
48"	9 $\frac{1}{2}$ "
60"	11"
72"	12"
84"	13"
96"	14"

Center Opening shades will open into two equal stacks on each side of the shade. For example a 96" Center Opening will have two stacks each the size of a 48" One Way.

20% Fullness shades will stack approximately 1 inch wider for small shades and 1 $\frac{1}{2}$ inches wider for larger shades, than a 5% Fullness shade of the same size.

All stacking dimensions are approximate and will vary by pattern.

Sliding Panels

Sliding panels provide a clean, contemporary look for large windows and doors. Overlapping panels are suspended from hangers, which glide smoothly in an aluminum track and pass in front of each other, to allow the panels to stack back away from the window.

The panels are supplied with edge binding to protect them from wear and tear and the panels are customized, based on the width of the shade and the number of panels. Panels can be made with privacy or black-out liners.

Sliding panels can be one way draw or center opening. They are also available with wand or cord operation.

Note: Bamboo and natural materials can stretch or shrink, so we recommend that panels are ordered with at least $\frac{3}{4}$ " clearance from the ground. Also, when shipped from the factory, panels may be slightly different lengths (up to $\frac{1}{2}$ " from the ordered length). Shorter panels can be made longer by gently pulling on the bottom of the panel until they are the same length as longer panels.

No Charge Options

One Way Opening

When open the panels stack back to either the right or the left. Specify on the order form which side of the window the panels will stack to.

NOTE: If you want the material to stack completely away from the window, for an unobstructed view, allow for the width of the panels in the overall width of the shade. See "**Specifications**" for more details.

One-Way Right Stacked

Center Opening

Must be made with an even number of panels and the panels will stack back to both sides.

Wand Draw

Shade is operated by means of a white aluminum wand which clips into the front edge of the lead panel. Wood wands are available (see **Surcharge Options**).

Wand

Center Opening

Sliding Panel Surcharge Options

Liners

Available in Privacy or Black Out. Liners are sewn under the edge bindings on all four sides of the panels.

Valance

Valances are 8" long and are attached to the front and sides of the track by velcro. If ordered with the original shade, the velcro for the valance will be riveted to the front of the track, to ensure a lasting bond.

Valances are cut up the roll, so they wrap around the ends of the track. Valance returns are not required. For Inside Mount shades the valance will cover the front of the track only. For Outside Mount shades the valance will be made to wrap around both ends of the track.

If valances are ordered separately, both halves of the velcro will be provided, but the bond between the velcro and the track will not be as durable.

Wide Edge Binding

Panels will come with narrow (1 inch) edge binding as standard, which means that ½ inch is visible on the face of the panels. Wide (3 inch) edge binding is also available in the same colors.

Wood Wands

Wood wands are available 38" long and in a natural wood color with a clear coat. Wood wands attach by means of a hook to the front edge of the lead hanger and have a sculpted wood handle.

Custom colors of wood wand are available on request for an extra surcharge.

Sliding Panel Specifications

Size Limitations

Minimum Width: 48" Minimum Height: 24"
 Maximum Width: 144" Maximum Height: 108"

Standard Panel Configurations

WIDTH	TYPE OF OPENING	NUMBER OF PANELS	TRACK TYPE
48" – 84"	One Way	3 Panels	3 Channel
	Center Opening	4 Panels	4 Channel
84 ¼" – 120"	One Way	4 Panels	4 Channel
	Center Opening	4 Panels	4 Channel
120 ¼" – 144"	One Way	5 Panels	5 Channel
	Center Opening	6 Panels	3 Channel

Typical Panel Sizes (Outside Mount Shades)

WIDTH	ONE WAY DRAW		CENTER OPENING	
60"	3 panels	22 ¼"	4 panels	17 ¾"
72"	3 panels	26 ¼"	4 panels	20 ¾"
84"	3 panels	30 ¼"	4 panels	23 ¾"
96"	4 panels	26 ¾"	4 panels	26 ¾"
108"	4 panels	29 ¾"	4 panels	29 ¾"
120"	4 panels	32 ¾"	4 panels	32 ¾"
132"	5 panels	28 ¾"	6 panels	24 ¾"
144"	5 panels	31 ⅛"	6 panels	26 ¾"

Panel Size Calculations

Inside Mount: Deduct 1 ⅛" from the width. Divide by the number of panels and add 2 ½" for the overlap. Round up to the nearest ⅛".

Outside Mount: Deduct 7/8" from the width. Divide by the number of panels and add 2 ½" for the overlap. Round up to the nearest ⅛".

Track Dimensions

TRACK WIDTHS	
3 Channel	2"
4 Channel	2 ¾"
5 Channel	3 ¾"

The distance from the top of the track to the top of the panels is 1 inch. The factory will take account of this distance when calculating the panel length.

Mounting Depths

	3 TRACK	4 TRACK	5 TRACK
Minimum IB	2"	2 ¾"	3 ¾"
Flush IB	2 ½"	3 ¼"	3 7/8"

Wall or Face Mount: 2 7/8" flat mounting surface required.
 (Using L Bracket)

Inside Mount Deductions

IB Deduction (Width): ¼"
 IB Deduction (Height): ½"

One Year Limited Warranty

What is covered by this warranty and for how long:

For a period of one (1) year from the date of purchase, all products are warranted against defects in materials and workmanship provided that the product is installed according to the product instructions. We reserve the right to determine if your piece warrants a repair or partial replacement of any parts or in the unlikely event the entire piece is defective, we will replace this window covering with a new window covering of equal or superior value. This shall be your sole remedy under this warranty.

Who is covered by this warranty:

This warranty applies to the original customer with proof of purchase in a residential application within the United States.

What is not covered in this warranty:

This warranty does not cover removal or installation or reinstallation of any window covering. This warranty does not cover damage or defects caused by or resulting from improper maintenance, neglect or improper use, abuse, misuse, neglect, accidents, Acts of God, alteration, commercial use, installation, removal or reinstallation or exposure to excessive moisture.

Your rights under State Law:

This warranty gives you the specific legal rights. You may also have other rights which may vary from state to state. We will not be liable for **INCIDENTAL OR CONSEQUENTIAL DAMAGES** or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

THIS WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER OBLIGATIONS, LIABILITIES, OR WARRANTIES.
